

MOBILE ELECTRONIC COMMUNICATION DEVICE AND COVERING FOR
SIMILAR DEVICES WITH ORNAMENT ATTACHMENT MECHANISM

ABSTRACT

5 A mobile electronics communications device with a housing and an ornament
attachment mechanism. The ornament attachment mechanism provides the ability to
customize the appearance of the device in a more personal and unique manner. A covering
for a mobile electronics communication device with an ornament attachment mechanism
provides the ability to customize the appearance of devices that have replaceable coverings in
10 a similar manner. The ornament attachment mechanisms can be realized in a variety of ways
including, but not limited to, the housing or body having a hole, a penetrable membrane, an
appendage, or an appendage with a ring.
